SOWING WINDOW

Recommended Sowing Period

Potential Sowing Period depending on seasonal conditions

LG Antigua is a consistently high yielding east west only recommended variety and possesses the crucial trait of pod shatter resistance. Pod shatter has proven its worth in securing yields over the storms we have experienced in recent seasons as well as the extreme heat. LG Antigua has an early maturity and even with its E/W recommendation had shown consistent yields across all regions. LG Antigua's growth habit offers a wide drilling date and offers strong disease resistance portfolio.
