Oil Content (@ 9% moisture)	<b>46.5</b>	45.2	46.9

## AGRONOMIC PROFILE

Data from the AHDB Oilseed Rape Recommended List 2026/2027. On the 1-9 scales, high figures indicate that a variety shows the character to a high degree (e.g. high resistance). ( ) = limited data. Yield figures for regions where the variety is not recommended are provided for information only and are indicated in italics. Agronomic features marked with \* are breeders perspective.
